****Keywords**:** Sexual dimorphism, multivariate, morphological evolution

Short Title: Multivariate Test of Rensch's Rule

Author Contributions: DCA devised the approach, AK provided the empirical example; all authors contributed to all parts of this manuscript.

Data Archiving: Data will be made available on DRYAD upon publication.

Acknowledgments: We thank XXX for comments on drafts of this manuscript; Ana Perera, Inés Freitas and Daniele Salvi for the phylogeny reconstruction; and Chiara Ripa and Zélia Pereira for aiding shape data acquisition. This work was sponsored in part by National Science Foundation Grant DBI-1902511 (to DCA), and by FEDER Funds through the Operational Competitiveness Factors Program - COMPETE and National Funds through FCT - Foundation for Science and Technology within the scope of the project "PTDC/BIA-EVL/28090/2017 - POCI-01-0145-FEDER-028090" (to AK).
